

Jing-Zhang Kilometre Zero

An AI innovation belt starting from the railway origin — heritage narrative × youth-friendly public space

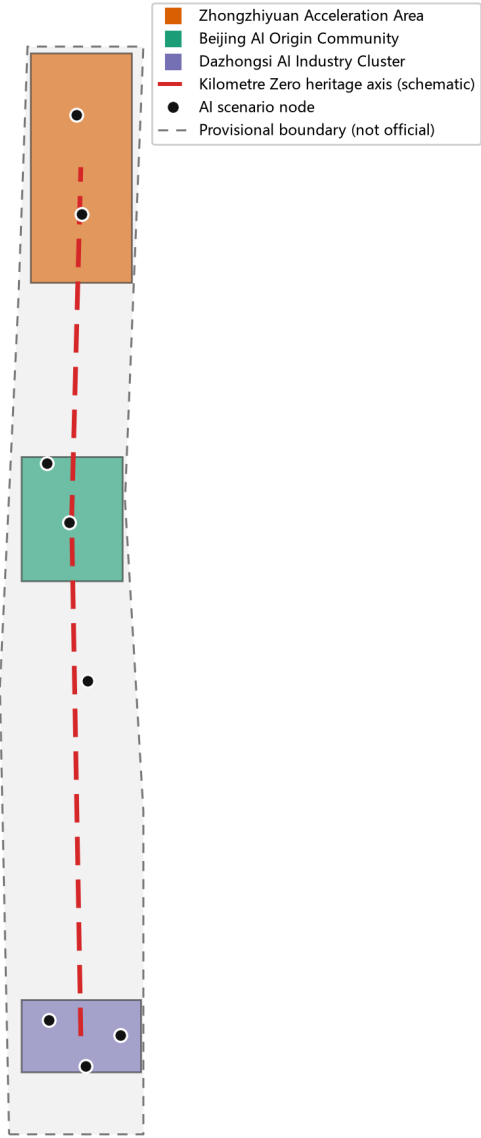

Author: phdetector | Centennial Jing-Zhang AI Innovation Belt Open Call

This package is generated from the repository provisional boundary, not an official redline; full recalculation is required after official data is published.

01 Design Basis and Source List

- Prepared from the official Pre-Qualification Announcement and the repository machine-readable task package.
- Uses the provisional boundary while the official redline is unavailable, labelled official_boundary=false.
- Cases and public materials serve as background; formal conclusions rely only on usable_for_formal=yes sources.

Jing-Zhang Kilometre Zero • Overall Concept and Spatial Framework (v1.7)

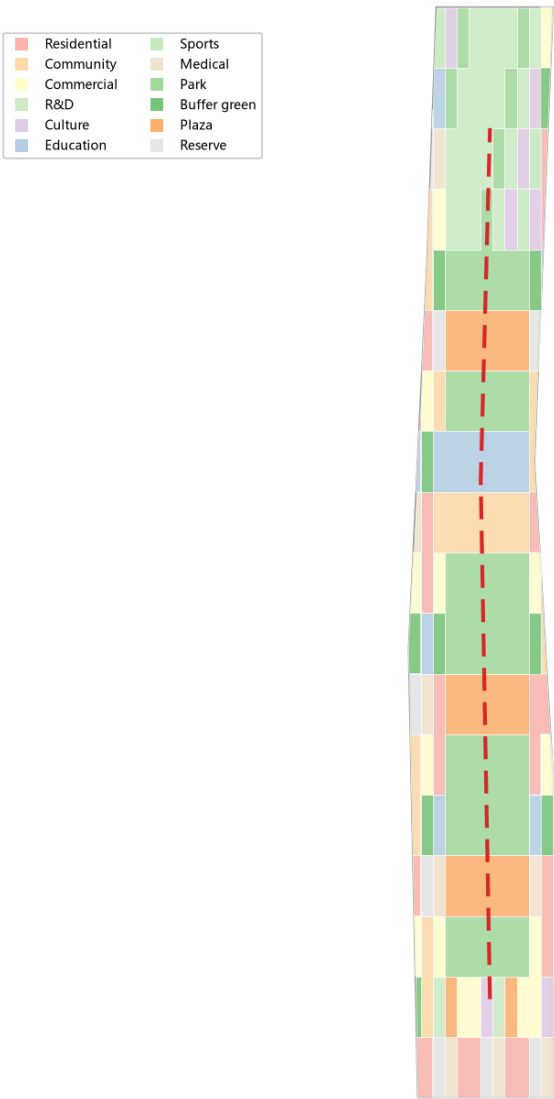

Overall concept and evidence chain

02 Three-Level Scope and Overall Concept

- Coordinated research area 43.6 km²: timeline–innovation chain–public-space belt model.
- Overall design area 11.4 km²: Kilometre Zero main axis plus three station-like core areas plus two wings.
- Key areas 368.4 ha: Acceleration Segment (Zhongzhiyuan), Origin Station (AI Origin Community), Interchange Station (Dazhongsi).
- Core concept: redefine the railway's kilometre zero as the AI-era urban starting point.

Jing-Zhang Kilometre Zero • Conceptual Land-Use Structure (provisional base, v1.7)

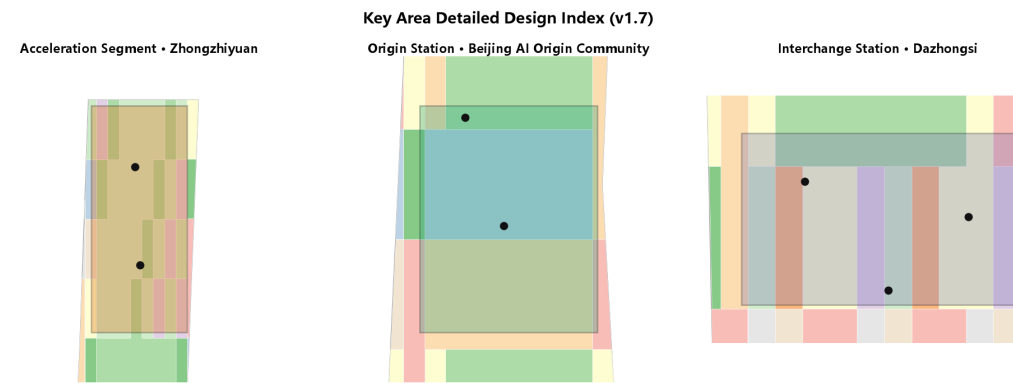

Source: repository provisional boundary, not an official redline; full recalculation required after official data

Three-level scope and spatial structure

03 Coordinated Research Area: Industry and Future City

- Innovation chain: university origin → open-source collaboration → enterprise transformation → public experience → international dissemination.
- Case references: King's Cross, Kendall Square, one-north, High Tech Campus, Yunqi Town, Tokyo rail hubs, South Lake Union, Digital Media City; Hangzhou interaction references: 2026 Yunqi Conference, City Brain 3.0, Zhejiang Lab, Dream Town.
- Five functions map to: full-stack system→Acceleration Segment; ecosystem→Origin Station; scenarios→Life Line; vibrant city→public-space belt; governance→open governance protocol.

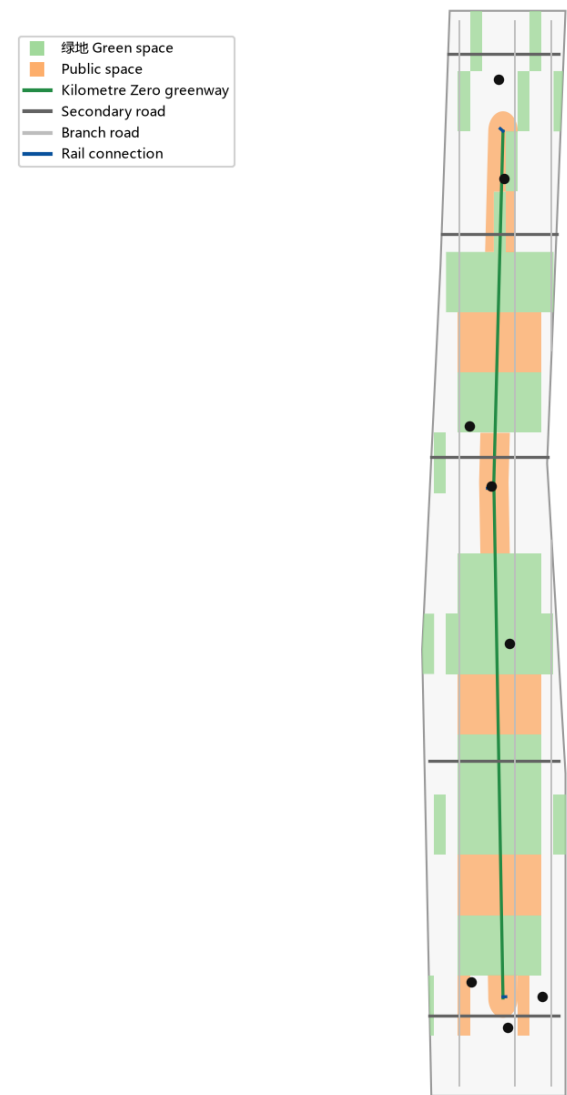

Key area design index

04 Overall Design Area: Urban Renewal

- Land-use structure: park skeleton + innovation courtyards + living blocks.
- Renewal framework: light pilot first, addition later; repair slow-mobility breaks and public space before courtyard renewal.
- Missing regulatory items: FAR, height, setbacks and road redlines are pending confirmation.

Jing-Zhang Kilometre Zero • Slow Mobility, Rail Links and Blue-Green Public Space (v1.7)

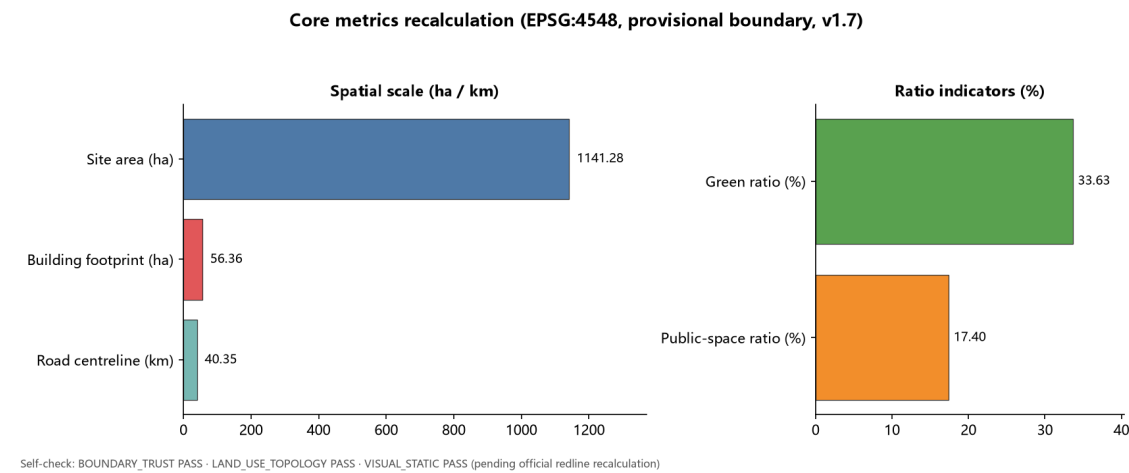

Source: repository provisional boundary, not an official redline; full recalculation required after official data

Mobility and blue-green public space

05 Detailed Design of Key Areas

- Zhongzhiyuan · Acceleration Segment: Qinghe low-carbon frontage, open testing field, safety-governance display.
- Origin Community · Origin Station: campus-park stitching, open-source release hall, transformation stations, Kilometre Zero Monument.
- Dazhongsi · Interchange Station: four-quadrant walking, international showcase hall, agent and smart-terminal displays.

Metrics recalculation

06 AI Innovation Ecosystem, Personas and Scenarios

- Seven personas: open-source developer, startup team, enterprise visitor, local resident, university student and faculty, older resident, international developer/visitor.
- Sixteen scenario cards including three industry test-and-validation scenarios: AI testing sandbox, enterprise Copilot station, low-speed delivery pilot.
- Three AI pilgrimage landmarks: Kilometre Zero Monument, Open-Source Achievement Gallery, Agent Contribution Honour Wall.

07 Land Use, Buildings and Retain-Renovate-Demolish

- Twelve conceptual land-use zones cover the full boundary without gaps or overlaps.
- Building layer distinguishes retain/renovate/new as conceptual directions only.
- Development intensity and height controls await official regulatory conditions.

08 Transport, Rail, Municipal and Public Services

- Kilometre Zero slow-mobility axis + rail connection + slow mobility first.
- Edge compute, distributed energy and smart infrastructure start as light pilots; formal scale awaits municipal conditions.
- Public services organised in four tiers: Origin Station, Acceleration Segment, Interchange Station, living blocks.

09 Blue-Green Network, Public Space and Urban Character

- Heritage-park vitality belt as the axis, connecting Qinghe, Xiaoyuehe, parks and plazas.
- Urban character narrative: centennial rails · digital signals · youthful streets.
- Wayfinding uses kilometre-zero milestones and signal-light colours; logo direction superimposes '0' with sleepers.

10 Renewal Projects and Phasing

- Near-term (2026–2028): slow-mobility repair, Kilometre Zero Monument, Global AI Activity Week launch.
- Mid-term (2028–2031): Origin Station release hall, Acceleration testing field, Interchange walking connectivity.
- Long-term (2031–2035): system governance and long-run operation.

11 Metrics, Area Recalculation and Compliance Matrix

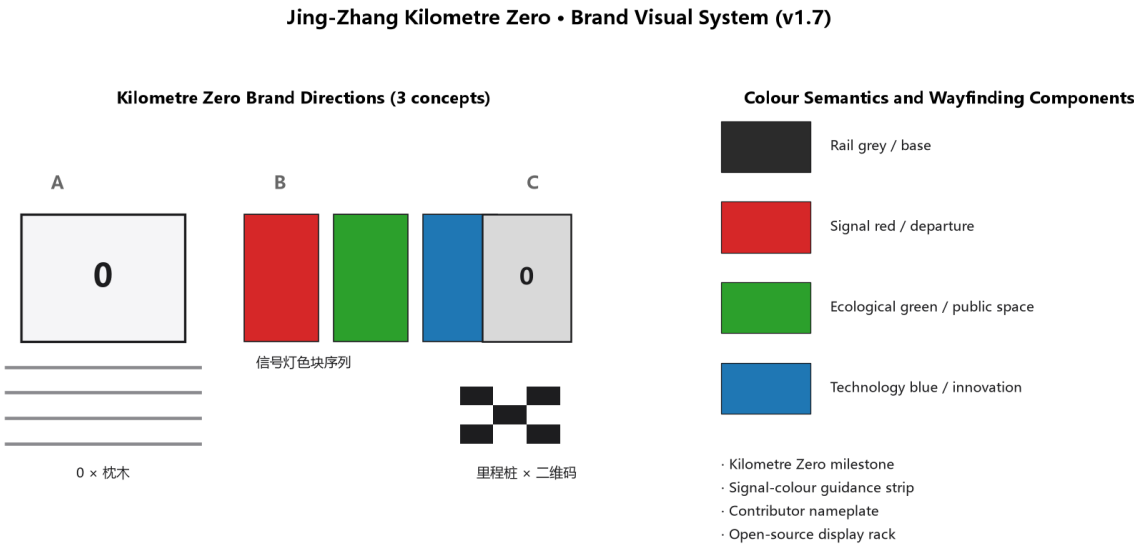

- EPSG:4548 recalculation: overall area about 1,141.3 ha; green ratio about 33.1%; public-space ratio about 23.0%.
- Key area areas about 192.9 / 104.3 / 72.0 ha.
- Compliance matrix covers announcement 1.3/1.4/1.5 and agent.1–agent.6.

12 Risk, Copyright and Compliance

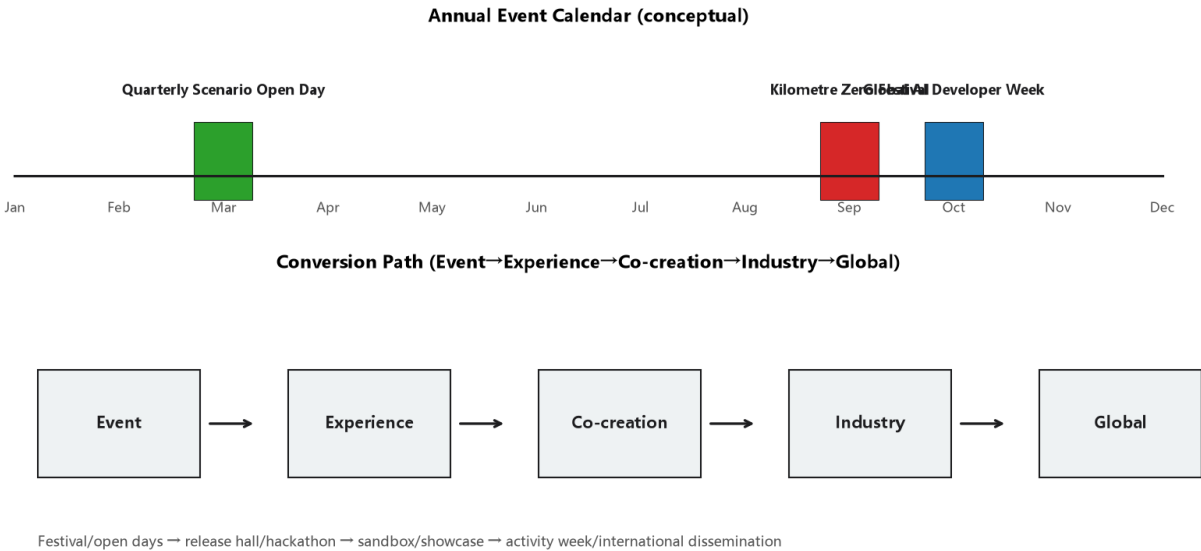

- Provisional boundary and missing regulatory controls are the main data risks, recorded in assumptions and self-check.
- Scenario data follows data minimisation, human review and reversibility.
- HTML is an offline static page; this proposal claims no official approval or guaranteed implementation.

13 Brand Visuals and Annual Operation

- Logo directions: 0×sleepers (primary), signal-light colour sequence, milestone×QR.
- Wayfinding: kilometre-zero milestones, signal-colour guidance, contributor nameplates, open-source display racks.
- Annual events: September Kilometre Zero Festival, October Global AI Developer Week, quarterly scenario open days.
- Conversion path: event→experience→co-creation→industry→global.

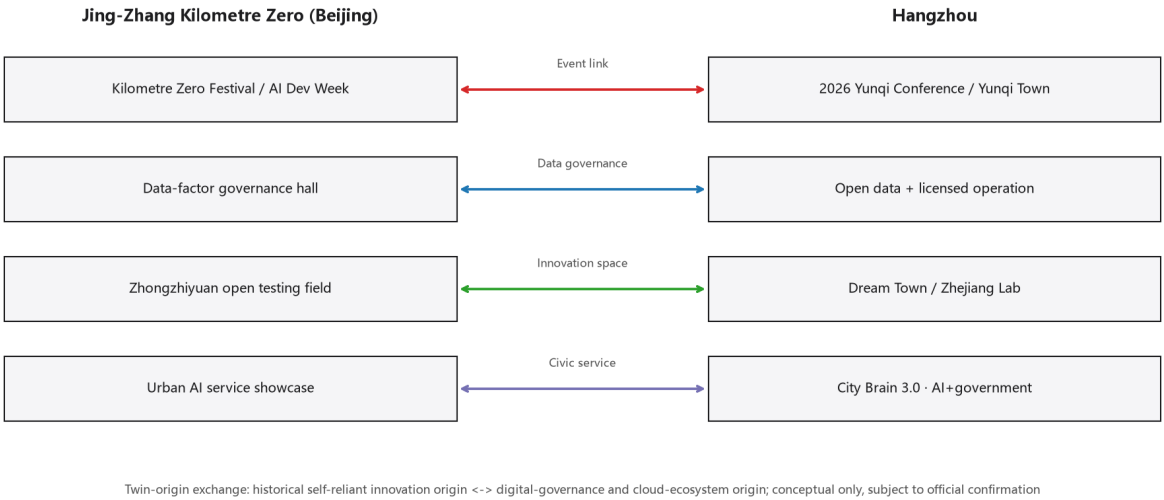

Jing-Zhang Kilometre Zero • Annual Operation and Conversion System (v1.7)

14 Hangzhou Interaction (Conceptual)

- Twin-origin exchange: the Jing-Zhang railway's kilometre zero (historical origin of self-reliant innovation) □ Hangzhou as the contemporary origin of digital governance and the cloud ecosystem.
- Event link: the September Kilometre Zero Festival connects with the 2026 Yunqi Conference (22–24 September, subject to the official announcement); October Global AI Developer Week enables joint releases and community recognition.
- Data governance and innovation space: drawing on Hangzhou's open data, licensed operation and sandbox regulation, plus Dream Town's 'core with no walls' and Zhejiang Lab, the plan organises a data-factor display hall and 'core campus + open testing field + scenarios beyond the boundary'.
- Civic service exchange: drawing on Hangzhou City Brain 3.0 and the AI+government-service paradigm, Dazhongsì Interchange Station hosts a showcase and joint drill subject to local approvals.
- All of the above are conceptual suggestions and background mechanism references; no government cooperation or investment commitment is implied.

Jing-Zhang Kilometre Zero • Beijing-Hangzhou Interaction Mechanisms (v1.7)

15 Science, Technology and Shared Responsibility (Conceptual)

- Shared vision: from the first self-built mainline railway (1905–1909 Jing-Zhang Railway) through Zhongguancun's 'daring to be first', to open source, explainable, co-created and autonomous intelligence, forming a readable continuous science-and-technology timeline.
- Shared responsibility principles: trustworthy (cleared outcomes only, generation and review actors labelled), explainable (human answer path for key Q&A;), reversible (stoppable pilots, safety officer on site), public benefit first (older and disabled needs enter design and review).
- Global open collaboration: open-source achievement gallery, open testing field, standards workshops and event-badge mutual recognition for global developers, researchers and the public.
- All of the above are conceptual suggestions and imply no new government commitment, international agreement or enterprise-cooperation statement.
